

AGNES WANGECHI

Electrical & Electronics Engineer

Queensland, Australia | EngWangechi@gmail.com | +61 483 741 256 | Open to full regional relocation | Seeking employer sponsorship

PROFESSIONAL SUMMARY

Electrical & Electronics Engineering graduate (University of Nairobi) with hands-on experience in telecommunications infrastructure, fibre-optic network deployment, and systems fault-finding at Safaricom PLC, Kenya’s largest telco. Capstone project on a dual-axis solar tracker for optimised power generation. Strong grounding in network and systems engineering, root-cause analysis, and technical documentation, with exposure to Agile delivery and cross-functional coordination with DevOps and engineering teams. Seeking an entry- to mid-level role in power systems and control systems in Australia; open to regional relocation and employer sponsorship. Have a positive skill assessment from VETASSESS.

EDUCATION

Bachelor of Science in Electrical and Electronics Engineering

Sep 2017 – Dec 2022

University of Nairobi, Kenya

Capstone project: Design of a dual-axis solar tracker for optimising solar power efficiency.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript (ES2015+), Python, Dart, HTML, CSS, C++, C, MATLAB, SQL, Git.

Frameworks and Libraries: Tailwind CSS, Styled Components, Pandas, Matplotlib, Numpy, React, React Native, Django, Flask, Nodejs, REST APIs, Flutter, GraphQL

Tools & Platforms: Git, GitHub, Docker, AWS Amplify, Firebase, Vercel, Netlify, Figma, WordPress, MongoDB, Jupyter Notebook, Notion, Slack, Jira, Linux, Kubernetes, Raspberry Pi, Arduino, MySQL, Postman,

Networking & Telecommunications: TCP/IP, fibre-optic network infrastructure, routing protocols, firewall configuration, VLAN configuration, 5G network rollout, network security, fault finding

Systems Engineering & Operations: Root-cause analysis, fault-finding, system handovers, production incident investigation, technical requirements review, change management

Project delivery: Agile delivery, technical documentation, quantitative & qualitative data analysis, stakeholder coordination

Other: Valid driver's licence

PROFESSIONAL EXPERIENCE

Program Co-ordinator

Jun 2025 – Present

International Education Research Project, University of Nairobi (funded by CODE, in partnership with Canada) | Nairobi, Kenya

- Oversee administration of data-collection surveys, key informant interviews, focus groups, classroom observations, and document analysis across multiple field sites.
- Manage data organisation, transcription oversight, cleaning, and secure storage to maintain research integrity and audit readiness.
- Support quantitative and qualitative data preparation using descriptive, inferential, and thematic analysis approaches.
- Coordinate research logistics, travel, field permissions, and stakeholder communication with schools and partner bodies.

Billing Engineer (Product Developer)

Aug 2023 – Jun 2025

Safaricom PLC | Nairobi, Kenya

Summary : As part of the CBS (Convergent Billing System) product delivery team at Safaricom PLC, I supported the planning, coordination, end-to-end product lifecycle from concept to deployment and execution of telecom product changes and launches. My responsibilities involve end-to-end project coordination, focusing on CBS system changes and aligning them with company-wide product development timelines and goals.

- Supported development and maintenance of the Okoa Chap Chap CBS product, contributing to KES 120M revenue within 3 months while supporting 40M active customers.
- Analysed and validated CBS Charging Data Records (CDRs) across Voice, Okoa, and SMS services to improve service reliability and fault resolution.
- Investigated system performance issues and production incidents, reducing critical defects by 30% through root-cause analysis and best-practice fixes.
- Reviewed and refined functional and technical requirements to align with backend system capabilities and telecom standards.
- Collaborated with DevOps, Backend, Product Owners, and Project Managers to deliver CBS enhancements within Agile sprint cycles.
- Managed system documentation, change requests, and configuration updates supporting controlled releases and operational stability.
- Coordinated with vendors and contractors to ensure adherence to technical and delivery requirements.
- Provided data-driven insights and system performance recommendations to senior stakeholders.

Telecommunications Engineer

Mar 2023 – Jul 2023

Safaricom PLC | Nairobi, Kenya

- Implemented new fibre-optic network infrastructure deployment and technical configuration, resulting in 2,000 new fibre subscribers within 2 months of installation.
- Managed on-site field technicians, enforcing strict industrial workplace health and safety (WHS) protocols while ensuring deliverables met rigid timelines.
- Supervised the physical installation and technical optimization of industrial fiber-optic networks and backup radio links to secure communication between field equipment and operations centers.
- Provided technical support and troubleshooting for customer issues, resolving 95% within SLA timeframes.
- Supported the hardware testing, pre-commissioning, pilot roll-out and full live cutover of 5G network infrastructure across 3 regions in Nairobi.
- Gained hands-on experience with routing protocols, firewall settings, and VLAN configurations.

PROFESSIONAL RECOGNITION

VETASSESS skills assessment: Positive skill assessment in 511112: Program or Project Coordinator/Administrator.
